TIMEPILOT®

- ➤ Stop estimating (or guessing!) workers' hours.

- ➤ Eliminate math errors when calculating time.

- ➤ Take minutes, not hours, for payroll preparation.

How Cloud Edition works:

1. When employees clock in or out, the data is sent to a TimePilot database stored in the Cloud.

2. Use the Windows-based TimePilot 5 management software on your PC to access your Cloud-based data wherever you have internet service.

TimePilot Cloud Edition is offered by annual or monthly subscription. Annual subscriptions, including TimePilot 5 management software, free smartphone and PC apps and unlimited support, start at $299 per year.
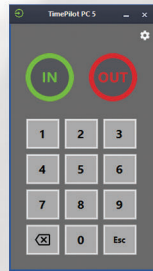

Designed and built in USA

TimePilot Cloud Edition:

Because your clock-in data is stored in the Cloud, employees can clock in anywhere on the planet!

Build a complete system with free apps for smartphones and PCs ...

Or

... Add hardware-based clocks to the smartphone and PC apps for a custom system!

TimePilot Mobile app: for smartphones

TimePilot PC: for Windows computers

TimePilot Extreme Blue: Rugged and weatherproof

TimePilot Vetro: For indoors

TimePilot Tap: Portable

Cloud Edition's benefits:

- Employers can see clock-in data anywhere they have internet service.

- Employees can clock in anywhere with free smartphone and PC apps.

- Free tech support for as long as you use the system.

- Automatic database backups —don't worry about a hard drive crash!

- Limit supervisors' access to just their own employees.

- Export to QuickBooks, ADP and other payroll software or services.

Already a TimePilot customer?
Yes, you can use your current clocks and iButtons with Cloud Edition—and get the free apps and support!

Not interested in a Cloud Product?
Check out TimePilot.com to see our On-Premise Edition, which works with your Extreme Blue, Vetro and Tap clocks but keeps your database on your server or PC.
