TimePilot software screenshot.

Let your PC do the work! Eliminates math errors and cuts calculation time to seconds, not hours.

- Up to 2,000 employees.
- Automatic calculation of overtime.
- Creates wide variety of reports, or build your own from 100 different categories.
- Works with top payroll software and services, including QuickBooks.

(Actual size)

Each employee gets an iButton and uses it to clock in and out.

- Stops "buddy-punching."
- Fits on a keychain.

Looking for an electronic time clock system to replace your old punch clock?
TimePilot Standard is for you!

TimePilot Standard gives a real-time picture of which employees are on the job and which aren't.

And when it's time for payroll, the powerful, easy-to-use TimePilot software calculates work hours and prepares the data for the major payroll programs and services or in spreadsheet format.

Simple ... Powerful ... Flexible

What's in the box?

- Time clock
- 10 iButtons
- USB adaptor
- Power supply
- 50 feet of cable
- Software
- User manual
- Quick Start Guide

Our customers tell the story!

Rod MacNeille, of Charlestowne Cabinet and Countertop Distributors, a 60-employee business outside Chicago, used to spend hours processing time cards. **"Now it takes about 10 minutes,"** he says. **"I can't imagine going back to the old system of time cards."** He also likes the fact that without time cards, employees aren't tempted to alter their work hours by writing on the cards. **"One of the greatest things is that there's no way for anyone to manipulate the system."** MacNeille says the TimePilot software is easy to use. **"It's very simple. Anyone who can run a computer can hop in and do it."**

'I can't imagine going back to the old system of time cards.'

'It brought our payroll processing time down to 15 minutes with zero errors.'

Premium Wood Products' experience with time cards was "horrible," says company president Mike Wood. Wood says his old time card system was time-consuming and **"prone to errors with guys punching in and out."** It took an hour a week to process the cards, he says. **"When we switched [to TimePilot], it brought our payroll processing time down to 15 minutes with zero errors. It's been a huge help."** Wood says TimePilot saves his firm about \$100 a month. **"That's with 15 employees. You could very easily extrapolate that [to more savings for firms with more employees]. It's a great product."**

Top 10 TimePilot software features

- User-friendly, password-protected Windows-based software.
- Handles up to 2,000 employees.
- Automatic calculation and monitoring of overtime.
- Complete report generation.
- Handles multiple departments simultaneously.
- Interfaces with ADP, Paychex, Peachtree, QuickBooks and many others.
- Easily handles complicated pay policies.
- Weekly, bi-weekly, semi-monthly and monthly pay periods.
- Ability to set bonus/penalty policies.
- Absentee and on-time reporting and monitoring.

What's an iButton?

The iButton® is a computer chip enclosed in a stainless steel container. Each iButton has a unique ID number which is unaffected by magnetic fields, metal detectors, water and most common chemicals. The iButton is wear-tested for 10-year durability and can be reassigned quickly and securely. In TimePilot's time and attendance systems, the iButton is part of a keyfob that attaches to an employee's keychain.

Two more great time and attendance solutions from TimePilot!

(Monitor not included)

TimePilot PC

Our software-only product installs on up to five computers, with additional licenses available. Employees can clock in at a central computer, or install it on all computers and clock in right at your desk!

TimePilot Extreme

It's weatherproof, portable and linebacker-tough. Mount it outdoors—on a wall, a job box, or even the side of a truck—to let employees clock in right at the site. Employees use just 1 iButton.

Combine TimePilot systems to create the perfect system for you!
